

Pacific BioEnergy

**PACIFIC BIOENERGY CORPORATION  
FOREST OPERATIONS SUPERVISOR**

**JOB TITLE:** Forest Operations Supervisor

Pacific BioEnergy is a private company established in 1994 with corporate offices in Vancouver, BC and operations in Prince George, Quesnel and Chetwynd/Fort St. John, BC.

Reporting to the Woodlands Manager, the Forest Operations Supervisor will be expected to support a safety culture consistent with Pacific BioEnergy's vision and lead by example to ensure other companies we are partnered with do the same. The Forest Operation Supervisor will work individually and with a team of forestry professionals responsible for all aspects of forest operations. The Forest Operations Supervisor will be accountable for performing a wide variety of services to support the harvesting operations of Pacific Bioenergy along with managing the overall forest residue program for Pacific Bioenergy's operations.

As Forest Operation Supervisor, knowledge of timber harvesting is essential in this role as well as a sound understanding of the legislative requirements affecting forest management such as the Forest and Range Practices Act, Forest Practices Code, and the Forest Act.

**KEY ACCOUNTABILITIES:**

- Ensure that the safety needs at Pacific BioEnergy operations are met in the areas of policy, program, procedure, and observation. This can only be realized through leadership and follow up.
- Oversee all phases of timber operations, including road construction and maintenance, harvesting, hauling and post-harvest obligations on the 700,000 m<sup>3</sup> AAC licences in Quesnel as well as existing and "special license tenures" that may be acquired.
- Manage all aspects of the residual fibre program including sourcing, scheduling and contract management.
- Conduct forest operational inspections – safety, quality, environmental compliance.
- Provide input into the development and implementation of Pacific BioEnergy environmental and forest certification programs as well as ensuring operations are in compliance with plans and certifications.
- Form positive relationships and interface with Internal Customers, Team members, External Customers, First Nations, MOE, MOF, the Public and other Stakeholders.
- Work closely with all forestry department staff in the development of annual strategic Woodlands Management Plans that meets Pacific Bioenergy objectives and continuous improvement opportunities for the forestry department including participating in the budgeting process when required and managing costs within that budget.
- Develop strategies and provide leadership and direction to improve safety, reduce operational costs, enhance log value, and maximize margins while meeting pellet facilities requirements.
- Participate in various contract negotiations when required.

**REQUIRED QUALIFICATIONS:**

- University Degree or Technical Diploma in Forestry with a minimum of 5-10 years' operational forestry related experience.
- Preference will be given to a candidate who is a Registered Professional Forester with ABCFP.
- Experience in all aspects of forest operations including harvesting, road building and deactivation.
- Possess sound knowledge of the principles and practices of forest management in British Columbia including the legislative requirements.
- Solid knowledge and experience in the forest tenure system.

- Experience with certification programs such as SFI and ISO 14001.
- Possess strong communication skills to present and explain information, draft correspondence, and issues responses, which are based on supporting information.
- Demonstrated leadership, teamwork driven, detail focused and results orientated.

If you wish to be part of a team that produces superior results and feel that your woodlands and business experience along with your innovative and creative attitude can contribute to our team, then we would like to speak with you. Please forward your resume in confidence to:
